

UPM-X

UPM-X makes Enterprise Architecture part of your organization's DNA

Enterprise Architecture is essential for sustainable transformation in your company. UPM-X helps you understand the current and long-term impact of planned changes in real-time.

WHY UPM-X IS DIFFERENT

UPM-X embeds Enterprise Architecture into the DNA of your organization by comprising architecture governance & design, metamodel governance, data governance, and portfolio management on top of ServiceNow.

You don't have to waste time figuring out how to integrate your EA solution with other sources such as CMDB, ITSM, PPM, LDAP, etc. UPM-X is 100% built on the ServiceNow platform and establishes a single source of truth for all operational and planning data.

» UPM-X goes beyond the traditional EA use-cases. «

Architecture Governance

Embedded end-to-end architecture governance workflows to support architecture approvals while planning future changes.

Metamodel Governance

Plan new tables, fields, and relationships following the ServiceNow change processes and visualize your data model using Designer.

Data Governance

Ensure mandatory data is current, complete, and correct while motivating your federated stewards worldwide to verify data regularly.

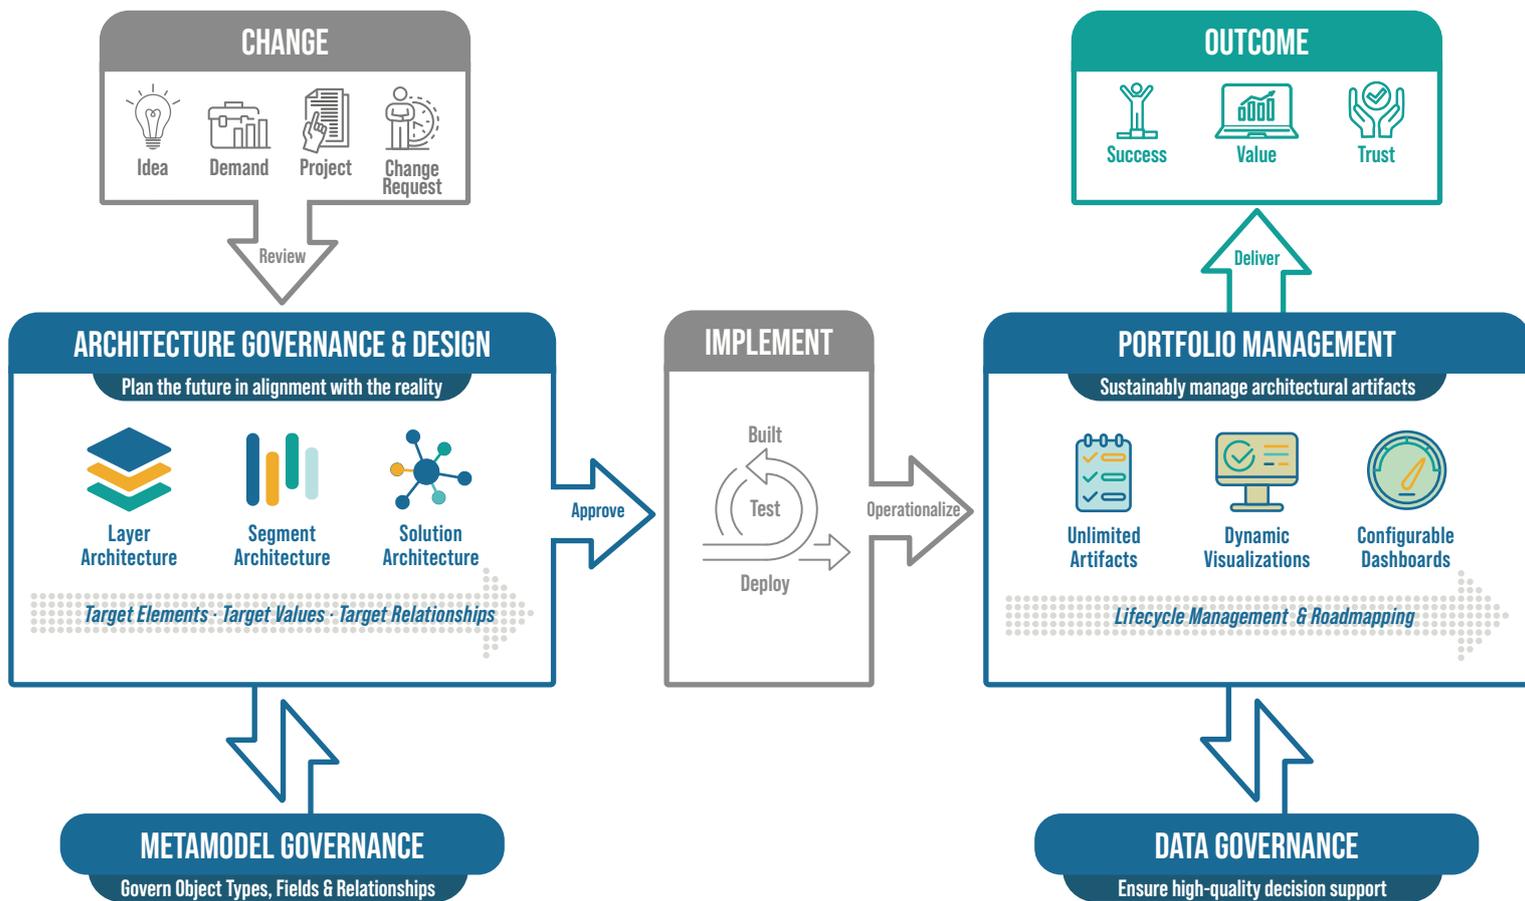

Built on 

Built on Now™ is the highest technical designation and certification to a ServiceNow Solution Partner application on one platform and one architecture. UPM-X has been designed and tested for fast, agile, resilient, secure, human, and connected digital transformation.

Enterprise Architecture Management

Architecture-Driven Transformation

UPM-X enables Enterprise Architects to support end-to-end transformation processes across their organization. By extending ServiceNow's architecture, metamodel, and data governance, UPM-X offers improved portfolio management.

Portfolio Management

We have extended and improved ServiceNow's portfolio management capabilities to fit your needs and exceed your expectations.

Ready to go Use-cases

Prebuilt use-cases enriched with a vast assortment of visualizations and dashboards will ensure high satisfaction among your stakeholders as they make decisions.

Built by Practitioners

We love EA! We love to deliver success and value. We see beyond the academic frameworks and metamodels.
